Side Adapter (Stegmeier)		T1870
End Adapter (Stegmeier)		T1872

Equipotential Bonding Grid System

Bonding Grid Meets NECE 680.26 (C)

NEC 680.26 (C) requires that all parts specified in 680.26(B) shall be covered or bare, not smaller than 8 AWG or rigid metal conduit of brass or other identified corrosion-resistant metal conduit. Connection shall be made by exothermic welding or by listed pressure connectors suitable for the purpose and are of stainless steel, brass, copper, or copper alloy.

Used underneath the paved surface 3' out from the edge of the pool

EquiBond Grid comes in two sizes: 2'x 100' roll (T1650), and 3'x100' roll (T1645). All made from welded #8 solid copper, with 12" spacing on grid. Each roll comes with the accessory kit above, and can be installed by one person. When using a 12" beam on pool edge, the 2' wide roll provides a total of 3' from edge of pool. When less than a 12" beam is used, the 3' wide roll is required.

	ItemNo.
2' x 100' Roll and Accessory Kit	T1640
3' x 100' Roll and Accessory Kit	T1645

Accessories Include
